

Senior Consultant Microsoft Dynamics 365 Business Central (US based)

OVO-Vision is the global ERP leader in the egg industry. From family-owned businesses to multinationals processing billions of eggs per week, we optimize operations with Microsoft Dynamics 365 Business Central. With an established US customer base, we are expanding further and need a Senior Consultant to help drive this growth.

As a Senior Consultant Microsoft Dynamics 365 Business Central (40 hours per week), this is a unique opportunity to be one of our first fulltime employees in the U.S. to help expand our business! Working closely with clients, you analyze business processes and translate their needs into a smart ERP configuration. In addition, you can coordinate project plans, monitor deadlines, and ensure a smooth implementation.

From system configuration and data migration to training, change management and user support, you'll keep everything running smoothly. Additionally, you'll help build a strong US team and make sure our ERP solution becomes the new standard in the U.S. poultry market. And don't worry, you won't be on your own! We will get you up to speed with intensive bootcamp sessions, so you will be fully prepared in no time. Plus, you will work closely with our international team to make the U.S. expansion a success.

We offer a highly competitive compensation package, 28 vacation days, plus all the tools you need to do your job well. Hybrid work is possible, and we're looking for someone who is committed to establishing a strong presence at our U.S. customers.

Is this the next big step you've been looking for? If you have at least ten years of ERP implementation experience, including four years with Business Central, a master's degree, a financial background, and strong English communication skills (Spanish is a plus),
