

WEERT

SENIOR DEVELOPER MICROSOFT BUSINESS CENTRAL

Location : Weert, Netherlands (and partly remote)
Employment Type : 32–40 hours per week
Start Date : ASAP

About OVO-Vision

We are a leading provider of ERP software for the global food industry, with a specialization in the egg and poultry sector. Our solutions are built on Microsoft Dynamics 365 Business Central and are deployed worldwide. To strengthen our development team, we are looking for an experienced Developer with expertise in Business Central.

About the Role

We are seeking a skilled and versatile Senior Microsoft Business Central Developer to join our growing team. In this role, you will play a key part in developing, managing, and optimizing our Business Central solutions, while actively contributing to our technical roadmap and operational processes. You are a highly experienced and technically proficient developer with deep expertise in Microsoft Dynamics 365 Business Central. You are passionate about building scalable ERP solutions and thrive in a collaborative, innovation-driven environment where quality and performance matter.

Your responsibilities

- Develop and maintain scalable industry-specific solutions in Business Central (cloud & on-premise)
- Actively contribute to the change and incident management process, including analysis, documentation, and follow-up
- Collaborate on a future-oriented roadmap with stakeholders
- Integrate Business Central with external systems and the Power Platform
- Provide technical guidance and coaching to colleagues, and share knowledge within the team
- Monitor international market developments and ensure product quality and future-proofing
- Experience with designing secure and scalable cloud solutions in Azure is a plus.

Experience & Background

- 7–10 years of experience in MS Dynamics Business Central development
- Deep understanding of Business Central (on-premise and cloud) and core business processes such as finance, logistics, production, sales, and purchasing
- Proven ability to translate functional requirements into robust technical solutions
- Bachelor's or Master's degree, preferably in business economics, computer science, or a related field

Technical Expertise

- Expert in writing, testing, and maintaining AL code, with hands-on experience in extensions, events, interfaces, and design patterns.
- Strong knowledge of Visual Studio Code, Git, Docker, and PowerShell
- Development of extensions and customizations following event-driven architecture
- Experience with APIs and web services (OData, SOAP, REST)
- Integration with the Power Platform (Power Automate, Power BI, Power Apps)
- Understanding of permissions, security, and data privacy within Business Central
- Familiarity with SQL Server and SSRS
- Experience with Azure services such as Functions, Logic Apps, Key Vault, and DevOps
- Strong knowledge of MS Azure and cloud architecture principles (security, scalability, performance)
- Define and maintain the overall architecture of our Business Central environment
- Design scalable, secure, and future-proof ERP solutions aligned with business goals
- Evaluate and select technologies, frameworks, and integration strategies
- Collaborate with stakeholders to translate business requirements into architectural designs
- Ensure compliance with best practices in software architecture, security, and performance

Testing & Deployment

- Experience with test automation in AL (e.g., using test codeunits)
- Familiarity with CI/CD pipelines for Business Central (Azure DevOps, GitHub Actions)
- Knowledge of the AppSource publishing process (for ISVs)
- Experience with DevOps and modern development methodologies

Soft Skills & Mindset

- Proven experience in shaping operational processes such as change and incident management
- Strong communication skills and the ability to bridge technical and business perspectives
- Proactive mindset, analytical thinking, and a passion for quality and innovation

What we offer

- A key role within an innovative and growing organization
- Flexible working hours and hybrid work options
- Competitive salary and excellent secondary benefits
- Opportunities for personal development, training, and certification
- Work with the latest technologies in a dynamic cloud-first environment
- Collaborate in a multidisciplinary team of developers, consultants, a project manager, and a product owner, where teamwork and innovation are central

Interested?

Send your CV and motivation to g.vandebeek@ovo-vision.com and become part of our team that takes ERP solutions to the next level.
